

MUHAMMAD WAJAHAT HAIDER

AI/ML ENGINEER

Lahore, Pakistan | +92-309-5945489 | mwajahath81@gmail.com | linkedin.com/in/mwajahathaider | github.com/wajahat81

ABOUT ME

Motivated and detail-oriented Computer Science graduate with a strong problem-solving mindset and a genuine curiosity for how technology can solve real-world problems. Known for taking ownership of tasks from start to finish, staying calm under pressure, and adapting quickly to new tools and challenges. A collaborative team player who also thrives working independently, with a continuous learning attitude and a drive to grow into a role where I can contribute meaningfully and keep improving.

EDUCATION

Bahria University | Lahore, Pakistan

2022 – 2026

Bachelor of Science in Computer Science | CGPA: 3.3/4.0

TECHNICAL SKILLS

Languages: Python, C++, C#, SQL, HTML, CSS, Dart

Frameworks & Libraries: FastAPI, Django, Django REST Framework, Flutter, React, Matplotlib TensorFlow, Keras, OpenCV, NumPy, Pandas

Databases & Tools: MS Visual Studio, Visual Studio Code, Jupyter Notebook, Google Colab, SQL Server, JWT Authentication, PostgreSQL, Supabase, MySQL, Git/GitHub, GitLab, Docker, AWS, LangGraph, Power BI

WORK EXPERIENCE

NetSol Technologies Inc, Lahore

June 2025 – August 2025

Python Full-Stack Developer Intern

- **Developed** a real-time computer vision classifier for traffic signal recognition utilizing OpenCV and Python.
- **Built** robust full-stack features connecting React frontends with FastAPI backends to accelerate internal enterprise data processing.
- **Completed** rigorous CS50 AI Harvard coursework to deploy advanced algorithmic solutions and intelligent agents within ongoing development sprints.

KEY PROJECTS

Oasis Thrive Track — Final Year Project, Developed for Oasis School for Autism

Flutter, React, FastAPI, Supabase, Gemini API

- **Designed** a customized communication diary and Management System specifically for the **Oasis School for Autism**.
- **Integrated** the Google Gemini API to power intelligent, automated narrative summaries, reducing manual data logging effort.
- **Constructed** a secure, role-based backend infrastructure using FastAPI and Supabase PostgreSQL, ensuring the privacy of sensitive student data across daily interactions.

AgriScan

Flutter, TensorFlow, Keras, Python

- **Designed** an AI-powered mobile application capable of on-device image classification for detecting plant leaf and insect diseases.
- **Trained** Convolutional Neural Network (CNN) models using TensorFlow and Keras on extensive agricultural datasets.

Neural Network Digit Recognizer

Python, Neural Networks

- **Developed** a baseline neural network from scratch to accurately classify handwritten digits, validating core deep learning principles.
- **Refined** feature engineering and training loops for predictive modeling, demonstrating a strong foundation in data science and algorithmic optimization.

Shopping Revenue Predictor

Python, Machine Learning

- **Improved** preprocessing and trained regression model to accurately predict revenue generated by customer.
